General comments/How to improve:

Please, check the attached zip file. It contains:
(1) a PDF with the marking criteria and feedback, and
(2) a TXT with the output of the automated tests only if we managed to run them. In this file, you find the exception trace for the tests that had failed. The name of the test should be sufficient for you to understand what was been tested and in which scenario. The exception message adds further details to help you replicate the test on your own.

Second marker comments (where appropriate):

Agreed mark:
